

SAVINGS CALCULATOR

How much money can you save?

Our Savings Calculator helps you estimate how much data and file storage capacity you can save by using AttachmentExtractor (AE) to move email content and attachments from Dataverse. It provides you with a clear picture of potential cost savings on storage and calculates your return on investment (ROI) based on your current usage.

How to use the Savings Calculator

1

Enter Your Dataverse Capacity Consumption

Check the current size of the following tables:

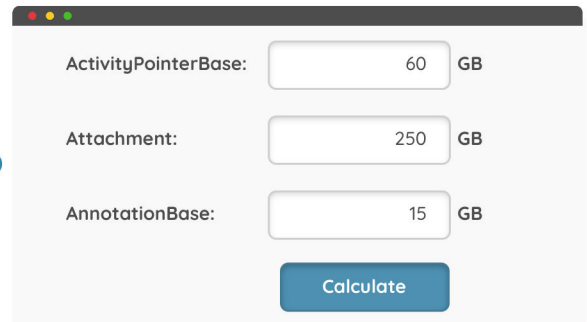

ActivityPointerBase: Stores activity data

Attachment: Stores email attachments

AnnotationBase: Stores note attachments

How to find these values:

- Go to the [Power Platform Admin Center](#)
- Navigate to **Resources** > **Capacity** > **Dataverse**
You will see your current usage.
- Click on **Details** to get insights into your current consumption.

ActivityPointerBase: GB

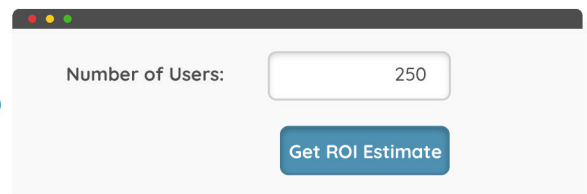

Attachment: GB

AnnotationBase: GB

2

Estimate Your ROI

Enter the number of **active Dynamics 365 users** to project your ROI
